REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Independent claim 1 is allowable over the prior art of record. Claims 2, 3, and 5-13 depend from claim 1, and therefore, are allowed.

Independent claim 1 recites the limitations of: splitting a 2D filtered bar code into an equal first part and an equal second part wherein each part has an upper and lower portion such that the lower portion of the first part and the upper portion of the second part will be white. The combination of these features as cited in the claims and in combination with the other limitations of the claim, are neither disclosed nor suggested by the prior art of record.

2. Applicant's information disclosure statement filed November 21, 2005, has been entered and considered. The disclosed reference, USPN 5,946,414 to Cass et. (hereinafter Cass), is not believed to disclose the limitation of splitting a 2D filtered bar code. The examiner recognizes Cass' teaching to divide a signal block into four sections with the lower left and upper right sections empty (see Figure 2). However, the examiner does not believe that Cass suggests or provides motivation to substitute a signal block with a 2D bar code.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Roberts (PN 6,882,442) is cited for teaching a bar code rendering including dividing bar codes into equal parts.
- Muratani (PN 6,768,807) is cited for teaching a spreading a digital watermark.
- Rhoads et al. (PN 6,636,615) is cited for teaching detecting a change in appearance in order to detect a copy image.
- Ulvr et al. (PN 6,415,983) is cited for teaching embedding a 2D bar code on a stamp.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
